## System Requirements For Unifeye Design:

Dwarf Fortress Alpha and Beta Versions require a 64-bit OS and processor. The initial release of DF is built in 32-bit mode, so if your machine doesn't natively support 64-bit then you will need to use a 64-bit OS and CPU in order to run it. For older machines you may need to upgrade to a newer OS and processor before you can run it. If you want to play on older machines, or if you wish to install it on your production or non-production machine, this will of course affect
